

Coronavirus (COVID-19) resources relevant to NCDs

As the global pandemic of COVID-19 continues to spread around the world, we are seeing countless lives lost, inequalities exacerbated, deep vulnerabilities in our health systems exposed, and a fundamental change in how we work, live and interact. As a global alliance, we will do everything within our capacity to raise our voices for the rights of people living with NCDs, older people and marginalized groups, and to share information and guidance to protect each other.

In full solidarity and alignment with the World Health Organization (WHO), and in collaboration with our members, supporters and 65 national and regional NCD alliances, our contribution will be to provide an NCD lens to this fast-moving health security challenge. We are therefore keen to share information, resources and good practice across our network during this outbreak, both in terms of the data and the response required.

Watch this space as we continue to collate information. We also encourage you to share via **this webform** relevant resources and tools. As ever, the power of the NCD movement is in our collective expertise and experience.

Keep safe and stay home,

The NCD Alliance team
